Supply Chain Management

The Mossel Bay Town Council on Tuesday, 20 September 2005 approved the Municipality's Supply Chain Management Policy that was drafted in accordance with the requirements of the Municipal Finance Management Act, No. 56 of 2003 (MFMA), as well as the Municipal Supply Chain Management Regulations, Government Gazette Notice No. 868 of 2005.

In terms of this policy, the Municipality is required to maintain a supplier database. Prospective bidders are therefore encouraged to register on the Municipality's Accredited Supplier Database.

The purpose of the supply chain management systems for Government and Provincial Departments, as well as municipal entities, is to give effect to the provisions of the Constitution and also the Municipal and Public Finance Management Acts. It is also to create an understanding for the Government's preferential procurement policy objectives, to make significant improvements to financial management and to promote consistency in respect of supply chain policy and other related policy initiatives.

The Municipality's Policy inter alia gives effect, as is required by law, to the Preferential Procurement Regulations, 2011. In terms of this Act, a points evaluation system must be applied to all bids or quotations above R30 000, including VAT.

If the transaction amount is between R30 000 to R1 000 000, including VAT, 80 points is awarded for price and 20 points is awarded to a bidder for attaining the B-BBEE status level
